KodeERP F&B — Client Test Guide

Najd Bites Food Co. (fictional) · KodeERP accounting for restaurants, organised like Foodics Accounting · updated 21 Oct 2026

Please read first. This is a **demo** with **synthetic data** (a fictional restaurant group with 3 branches). The link is a **temporary tunnel**: it can change or stop working, and is not production hosting. Please don't enter real customer, employee or bank data. Anything you create can be reset.

Link and logins

URL: `https://ran-dude-normally-brisbane.trycloudflare.com`

LOGIN (EMAIL)	PASSWORD	LANGUAGE	USE IT FOR
`najd.accounts.en@kodeerp.test`	`Najd-Dune-Saffron-2330`	English	Main tester: accounting, sales, purchasing, bank, inventory, assets, HR & payroll, reports — all branches
`najd.accounts.ar@kodeerp.test`	`Najd-Oasis-Kabsa-7495`	Arabic (RTL)	Same rights as above, in Arabic
`najd.olaya.manager@kodeerp.test`	`Najd-Cardamom-Amber-6671`	English	Branch manager: only Olaya data; can raise purchase requests, stock counts, waste, salary slips (no payroll run, approvals or opening balances)

How to switch language

- The quickest way is to sign in with the Arabic login above.
- Or, for any user: click the avatar (bottom-left) → **My Settings** → **Language** → choose *العربية* or *English* → **Save**. The page reloads in the new language and direction.

KodeERP is the accounting system, not the POS

Orders are taken in your POS (for example Foodics POS). POS sales are **synced or imported** into KodeERP in one of two ways (the automatic sync is not connected in this demo, so entries are made by hand):

- **Sales Invoice** to *Walk-in Customer* with VAT 15%, paid by the POS payment method (*Foodics POS*, *mada*, *Card*, *Cash*, *Aggregator*). Each method posts to its own **clearing account**.
- A **daily sales journal** using the template *Daily POS Sales (Foodics)*: debit POS / card / cash / aggregator clearing, credit Dine-in / Takeaway / Delivery sales, credit VAT output 15%.
- When the POS provider or bank pays out: **Receive / Pay / Transfer** → *Internal Transfer* from the clearing account to the bank, then **Bank Reconciliation**.

Tip: the **KSA VAT Return (Demo)** report reads sales and purchase invoices, so import POS sales as invoices when they must appear in the VAT return.

Where things are (left sidebar)

Accounting	Chart of accounts, journal entries and templates, recurring entries, opening balances, cost centres, branches, brands, dimensions, budgets, lock periods, period closing
Sales	Customers, quotations, sales invoices (credit notes: open an invoice → Create → Return / Credit Note)
Purchasing	Suppliers, purchase requests (with approval), purchase orders, purchase invoices (debit notes via Return)
Bank & Cash	Receive / pay / transfer, bank accounts, bank reconciliation, bank transactions, clearance dates, payment methods & clearing accounts
Inventory	Items, warehouses & kitchens, recipes, stock transfer & waste, stock count, landed cost, cost repost, stock balance / ledger, stock-vs-ledger check
Assets	Fixed assets, categories, movements (transfers), depreciation schedules, asset register, depreciation ledger
HR & Payroll	Employees, departments, salary structures and assignments, payroll run, salary slips, overtime & bonus, employee advances, leave, holidays
Reports	GL, trial balance, P&L, balance sheet, cash flow, profitability, gross profit, AR/AP, customer and supplier statements, bank reconciliation statement, consolidated financials, budget variance, payroll register
VAT & Tax	KSA VAT Return (Demo), sales / purchase / item VAT templates

Test checklist (about 60 minutes)

1. Sign in as **Accounts (English)**. Home shows KPIs, charts and quick actions.
2. **Sales** → **Quotation** for *Riyadh Events Co.*, branch *Olaya*, VAT 15% → Submit. Then **Sales Invoice** (branch is required; cost centre fills in) → Submit → Print.
3. POS-style sale: **Sales Invoice** to *Walk-in Customer*, then Create → Payment with method *Foodics POS* (goes to the Foodics clearing account).
4. **Accounting** → **Journal Entry** → *Get from template* → *Daily POS Sales (Foodics)*; fill one day's totals (clearing Dr = sales Cr + VAT Cr) and set Branch / Brand → Submit.
5. **Bank & Cash** → **Receive / Pay / Transfer** → *Internal Transfer* from Foodics clearing to the bank. Open **Bank Reconciliation** for the demo bank account.
6. **Purchasing**: sign in as the **Olaya manager**, create a **Purchase Request** (Olaya Kitchen) → *Submit for Approval*. Sign in as Accounts → open it → *Approve* → Create → Purchase Order → Submit → Create → Purchase Invoice → Submit (the PO shows 100% billed).
7. **Inventory**: **Recipes** → *Chicken Shawarma Sandwich* shows the food cost per sandwich (about SAR 4.72). **Stock Transfer & Waste**: Material Transfer (central store → kitchen), Material Issue to *Wastage & Spoilage* for waste, or Material Issue with *From BOM* = the recipe for ingredient consumption. **Stock Count** for a kitchen. Check **Stock Balance**.
8. **Assets**: new **Fixed Asset** (item *FA-001 Commercial Oven*, existing asset, depreciation on) → Submit → see the depreciation schedule; **Asset Movement** to move it to a kitchen; on the asset use *Scrap Asset* to see disposal.
9. **HR & Payroll**: new **Employee** (branch, holiday list *KSA Weekends 2026*) → **Salary Structure Assignment** (structure *Najd Standard Monthly*, base salary) → **Payroll Run** for the month → submit the salary slips (posts the salary journal).
10. **Accounting** → **Budgets** for a branch cost centre → **Reports** → **Budget Variance**. **Lock Periods** blocks posting into a closed month.
11. **Reports**: P&L (Monthly, filter Branch or Brand), Balance Sheet, Cash Flow, Profitability Analysis, Customer / Supplier Statement, Consolidated Financials, KSA VAT Return (Demo).
12. Sign in as **Accounts (Arabic)**: the whole interface, including the sidebar groups, is right-to-left Arabic. Repeat steps 2 and 11.
13. Sign in as **Olaya manager**: only Olaya data; payroll runs, approvals and opening balances are not offered to this role.

Not included yet (honest list)

- **ZATCA** e-invoicing (Phase 2, cryptographic stamp, QR on invoices) is **not** active on this demo site.
- **Zakat**: there is no built-in Zakat return or Zakat-base report; only a Zakat expense account. The Zakat calculation is prepared outside the system for now.
- **Statement of changes in equity** is not a standard report; equity movements are visible in the Balance Sheet and General Ledger.
- **Loans**: there is no loan-management module. Employee loans/advances use *Employee Advances* with salary deduction; bank loans are recorded on the loan accounts with journals.
- **POS sync** (Foodics or other) is not connected; POS sales are entered or imported as invoices or daily journals.
- Ingredient consumption is recorded as an issue from the recipe, not deducted automatically by every sale.
- **Arabic print** is partly English on some print formats and report headings. Bank feeds and email sending are not configured.

Known issues

- Balance Sheet / Accounts Receivable: with a single *Yearly* period the chart above the table can be empty. Choose *Monthly* to see the chart; the figures are correct.
- **Branch is required** on every Sales and Purchase Invoice; choosing the branch sets the cost centre for all lines.
- The branch manager can submit but not cancel invoices and salary slips (cancelling is for the accounts team).
- Cancelled documents marked *QA TEST* (invoices, orders, stock entries, assets, one payroll run and a QA TEST employee marked *Left*) are our test runs; they have no effect on the books.
- The temporary link can be slow on first load (30–60 seconds after idle).

دليل الاختبار باللغة العربية

هذه **نسخة تجريبية** ببيانات **غير حقيقية** لمجموعة مطاعم وهمية بثلاثة فروع. الرابط **مؤقت** وقد يتغير. يُرجى عدم إدخال بيانات حقيقية.

KodeERP نظام محاسبة وليس نقطة بيع: المبيعات تُسجَّل في نظام نقاط البيع لديكم (مثل فودكس) ثم تُستورد إلى KodeERP كفواتير مبيعات للعميل النقدي أو كقيد يومي باستخدام قالب *قيد مبيعات نقاط البيع اليومية* (مدين حسابات التسوية، دائن المبيعات وضريبة المخرجات 15%). الربط التلقائي غير مفعّل في هذا العرض.

1. القائمة الجانبية مقسّمة: المحاسبة، المبيعات، المشتريات، البنك والنقدية، المخزون، الأصول، الموارد البشرية والرواتب، التقارير، ضريبة القيمة المضافة.
2. أنشئ **عرض أسعار** ثم **فاتورة مبيعات** (الفرع إلزامي) واعتمدها واطبعها، ثم **دفعة** بطريقة فودكس أو مدى.
3. أنشئ **قيداً يومياً** من قالب مبيعات نقاط البيع، ثم **تحويلاً داخلياً** من حساب التسوية إلى البنك و**التسوية البنكية**.
4. **طلب شراء** من مدير العليا ← موافقة المحاسب ← **أمر شراء** ← **فاتورة شراء**.
5. المخزون: **الوصفات** (تكلفة الساندويتش)، **تحويل وهدر المخزون**، **جرد المخزون**، **رصيد المخزون**.
6. الأصول الثابتة وجدول الإهلاك وحركة الأصل؛ الموظفون و**مسير الرواتب**.
7. التقارير: الأرباح والخسائر لكل فرع أو علامة تجارية، المركز المالي، التدفق النقدي، كشف حساب العملاء، الموازنات، إقرار ضريبة القيمة المضافة.

غير متوفر حالياً: الفوترة الإلكترونية لهيئة الزكاة والضريبة والجمارك (زاتكا) ورمز QR، تقرير الزكاة، قائمة التغيرات في حقوق الملكية، وحدة القروض، والمزامنة التلقائية مع فودكس. بعض عناوين الطباعة ما زالت بالإنجليزية.

ملاحظة: حساب مدير فرع العليا يعرض بيانات فرع العليا فقط.
